

Safety Takes You Further

On 20th of December 2022, the team from SATS Ground Services and Falcon Logistics spotted a dog protruding his head out of its cage during baggage transit.

The team requested to contact the owner and enquired about the condition of the dog. At this moment, the dog broke free from its cage and ran towards the tarmac.

Quick-wittingly, the team informed CAG and activated the Certis perimeter team to locate the dog. Together, the team located the dog and also prevented it from becoming a potential risk to aircraft operations in the aerodrome.

Great job to the team's vigilance and fast actions in preventing a potential risk to aircraft operations as well as ensuring the aerodrome safety.
